Total (29)	<div style="width: 29px; height: 10px; background-color: black;"></div>

ABOUT US

Citizen Science Zurich is an initiative of the University of Zurich, ETH Zurich and the Mercator Foundation Switzerland. We want to strengthen Citizen Science - i.e. the participation of citizens in scientific research - and facilitate collaboration between science and society.

We support a large number of projects on various topics and with different forms of participation. You can find out more about those projects and how you can participate in research on our website.

Our free online course “Discover Citizen Science” provides an in-depth insight into the basics of Citizen Science in a fun and accessible way. Discover now! The course is only in German for the moment.

Together with *Schweiz forscht*, we have developed an interactive checklist. It simplifies the planning and implementation of participatory research projects. Take a look and try it out now!
