CITIZEN SCIENCE
MODULAR RESEARCH COURSE

- Organized by the Participatory Science Academy (UZH & ETH)
- At University of Zurich, RAA-E-30, Rämistrasse 59, 8006 Zürich or online
- For PhD students, post-docs and practitioners outside of academic institutions
- 1 ECTS credit for visiting the basis module and 3 advanced modules or more

Citizen Science research projects actively involve citizens in participatory research, which makes them face different challenges compared to disciplinary research projects. In order to involve citizens in a meaningful way, various overarching competencies are required. These competencies are taught through the corresponding modules of this research course. In doing so, we draw on interdisciplinary and transdisciplinary research, sustainability research, impact research, and current practical examples.

obligatory

Basis Module
18.10.2022, 13:30 - 17:30 (online)
or 15.11.2022, 13:30 - 17:30
What is Citizen Science? Is what I do called Citizen Science?

advanced modules

Impact-oriented Planning of Citizen Science Projects
17.11.2022, 13:30 - 17:30
How can I identify the impact of my project, and how can I work towards it in the most effective way possible?

Research Design for Participatory Citizen Science
22.11.2022, 13:30 - 17:30
What do I need to consider when planning my research project?

Community Management
22.11.2022, 13:30 - 17:30
How do I find citizens who are willing to participate in my project? And how do I motivate them to stay involved?

Facilitating Participatory Research Processes
13.12.2022, 13.30 - 17.30
How do I need to facilitate a participatory process?

Inter- and Transdisciplinary Integration
31.1.2023, 9.00 - 13.00
How can I bring together different types of knowledge? What is the role of researchers in this endeavour?

Evaluation Step-By-Step: How to Assess Project Impacts
2.2.2023, 13.30 - 17.30
What do I need to consider when planning and implementing my Citizen Science project's evaluation?
