

Phases of the research process

Every research project goes through various phases - from planning and implementation to the dissemination of research results. In this document, we present the most important steps that you should go through after receiving research funding.

Planning and Design (steps 1-4)

1. Definition of research topic and research question
2. Development of hypotheses
3. Determination of forms of inquiry / methods
4. Implementation planning

Project Implementation (steps 5-8)

5. Data gathering
6. Data processing
7. Data analysis
8. Data interpretation

Dissemination (step 9)

9. Publishing

Results Implementation (step 10)

10. Implementation
