Do you have a Citizen Science project idea and need financial support?

Once a year we award Seed Grants for the development or implementation of participatory Citizen Science projects. With the Grants we promote the participation and involvement of citizens in science and research and enable the implementation of innovative research projects. Teams of academic researchers from the University of Zurich or ETH Zurich and citizens can jointly submit their project idea. We are happy to support and advise you throughout the application process.

Priority is given to project applications that, in addition to the prospect of excellent research, show a societal benefit as well as a high degree of participation in as many phases of the research process as possible.

Eligibility

Teams of at least two persons are eligible to apply: an academic researcher working at UZH or ETH and a citizen.

Amount of funding

Applications can be submitted for up to 40'000 CHF.

Project duration

The funds must be used within 12 months of the start of funding.

Important Dates

Deadline: 03.03.2024, 23:59

Decision: in May 2024

Project start: after decision until end of 2024
